

...does
Coffee get
 into our
Imitation Leather?

...take a look inside and find out more

Open Day '23

Have you always wanted to visit our modern production facilities? No problem! On **June 03**, we will open our doors from **10:00 - 14:00** and offer exciting insights into the manufacturing of our diverse products. We also clarify the interesting question "How? and Why? does coffee get into our imitation leather." Furthermore, we have prepared a varied supporting program with special guest **Jasmin Graf** - singer and German dubbing voice of "Aida" in the animated film: "Mummies - A Totally Tangled Adventure", a great product fashion show, and a colourful children's program. Continued with: VOWAbag, Vogtland Radio, Carli's coffee roasting shop, Tourism Association Vogtland, Vogtland Shawm Train, CheerMANIA e.V. Auerbach, Cinema Bus and many more. The physical well-being is of course also well provided for!

Therefore, please feel free to drop by, we are looking forward to your visit! You can get more info [here](#)

We are there again...

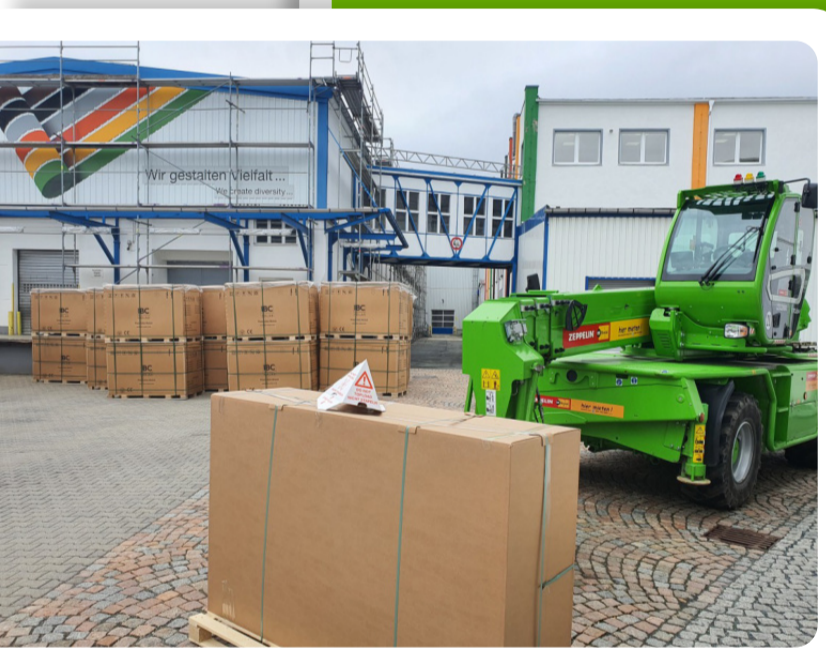

INTERZUM '23 - Pay us a visit!

Finally, the time has come, Interzum Cologne opens its doors again. At the international world's leading trade fair for suppliers to the furniture industry and interior design, we will also be represented with our booth from May 09 - 12, 2023 and present our innovations. This of course includes our sustainable stock collection **VOWA^{led} Puria**, which consists of over 50% renewable and bio-based raw materials. With this innovation, we have already generated a lot of interest at Heimtextil, reflecting the ever-increasing importance of ecological products.

Come to our booth A018 in hall 10.1 - our competent sales team will be glad to advise you.

Vowalon - Not only Green Inside ...
Soon also - Green Outside !

In mid-March, the scaffolding work on our production and storage halls began and now the mounting of the modern photovoltaic system is starting. A new solar energy system with 1600 modules will be built on an area of approx. 3,000 m², which occupies a good 2/3 of our existing roof area. With this investment of approx. 1.0 million €, we hope to achieve energy savings of approx. 500,000 kWh/year in the future. This is approximately equivalent to the annual consumption of 160 households and covers about 10% of our total annual electricity consumption. In view of the high energy prices and a supply situation that is uncertain in terms of planning, we are thus taking a further step towards sustainable production and energy independence.

News from our Trainees...
...and those who intend to become

Our trainees took part in an in-house workshop on employee and trainee recruitment in March. Ideas were worked out together and teams were formed for the implementation of various measures. We hope to be able to continue to inspire committed young people for one of the many different training directions at Vowalon in the future. The event was organised by the design agency Kismet GmbH from Reichenbach.

As a training company for various professions, we presented ourselves at the vocational and training fair in Auerbach in March. In addition to the classic professions of textile coating product finishers, industrial sales representatives and industrial mechanics, we also train mechatronics technicians, IT specialists, warehouse specialists and warehouse logistics specialists - m[f]d. Furthermore, we are partners for the dual study Bachelor of Arts.

On April 04, we welcomed the 7th grade class of the Klingenthal sports campus. The students were given a comprehensive tour of our production facilities and a lecture as part of their Science Day with a focus on "Chemistry". The participants were then able to demonstrate what they had learned in a multiple-choice test. The best among them received a certificate and a VOWAbag laptop bag as first prize.

Please keep in mind our summer vacation from July 31, 2023 - August 8, 2023!
