

# THE NEW CORDOBA COLLECTION

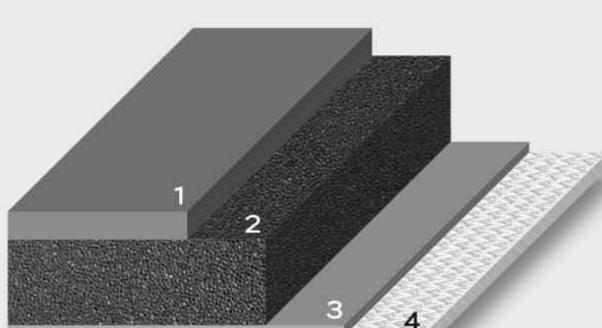

## Great success at Heimtextil 2026!

Our new, antimony-free Cordoba stock collection made a convincing debut at the Heimtextil trade fair. The realistically designed textile surfaces Linen, Luxe, Prisma Tech, and Prisma Eco were very well received by visitors and formed the focus of numerous successful discussions. The extensive colour palette with 59 designs left a lasting impression. Have we awakened your interest? Then please contact our [sales team](#) or visit our website at [www.vowalon.de](http://www.vowalon.de).

## All-rounder for the highest demands

### PVC/PUR hybrid: VOWA-Fusion

- 1 - PUR - top coat
- 2 - PVC - foam layer
- 3 - PVC - adhesive layer
- 4 - Textile carrier

Our innovative new product, VOWA-Fusion, combines the advantages of PUR and PVC imitation leather in a high-quality composite material. This versatile material impresses with its pleasant, soft feel and outstanding durability. In addition, VOWA-Fusion offers excellent resistance to disinfectants and abrasion, high scratch resistance, and effective flame retardancy. Last but not least, the product offers excellent price-performance ratio.

# 125 Years

## A festive atmosphere at Vowalon

A glamorous retrospective: Last year, Vowalon celebrated 125 years of successful company history. To mark the occasion, we invited our employees and their partners to a festive event in a stylish setting in August. A select culinary offering and live music from the band "Die Fetzentaler" contributed to a successful atmosphere. The grand finale was a spectacular fireworks display that lit up the night sky above Treuen in a blaze of colour.
