Stock Collections

 Made in Germany

AKV  international gmbh

Pisa

Pisa is a universal upholstery synthetic leather, which is also suitable for maritime applications due to its flame retardancy acc. to IMO FTPC Annex 1, Part 8. Pisa convinces with its fine leather embossing and high colour variety.

VOWA_Ied

VOWA_Ied

Padova Plus

The Padova Plus stock collection is a universal upholstery synthetic leather with a fine aniline leather print and a special leather touch. Padova Plus is available in many classic colours.

Peri

Peri is particularly suitable for the medical couch sector as well as for day-care centres and public facilities due to its biocompatibility and product class 1 according to Standard 100 by OEKO-Tex®.

VOWA_Ied

Amalfi

Amalfi is a high quality, universal synthetic leather for contract with a wide range of colours. Due to its biocompatibility and tremendous abrasion resistance, Amalfi is excellent for the medical field.

VOWA_Ied

VOWA_Ied

Pavona

The Pavona contract collection is highly flame retardant acc. to DIN 4102 (B1) and has an extended service life due to the AvalonVinylSave surface protection. Pavona convinces with its discreet leather embossing and modern colours.

Chicago M

The Chicago M contract collection includes classic and modern plain colours as well as aniline leather prints. Due to higher material strength and the special finish ACTICIDE®, it is also suitable for gastronomy and medicine.

VOWA_Ied

Puria

Puria is a vegan upholstery synthetic leather, which consists of over 50% bio-based and renewable raw materials. Available in two high quality finishes: Linen look Puria Linen and leather look Puria Basic.

VOWA_Ied

VOWA_Ied

Pasco

Pasco is a very high-quality PUR upholstery synthetic leather, which is characterised by its particularly soft feel. It is solvent-free, universally applicable and fascinates with classic colours and a noble texture.

Cordoba

The versatile object collection Cordoba is available in various finishes: Uni, Linen, Alligator, Flowers, Prisma and Anjo. Also suitable for outdoor due its ACTICIDE® finish (antimicrobial, antibacterial and antifungal).

VOWA_Ied

VOWA_{classic}

The cross-segment stock collection VOWA_{classic} includes a wide range of high-quality products from our divisions VOWA_{led} (upholstery synthetic leather), VOWA_{car} (automotive synthetic leather), VOWA_{dur} (small leather goods) and VOWA_{home} (table protectors).

With this all-round collection, we offer materials for a wide range of applications: Ideal for technical upholstery, automotive upholstery or bag making, as well as outdoor, maritime and hospitality applications. VOWA_{classic} also scores with optical diversity! Classic leather embossing and technical finishes guarantee a high level of choice.

By using different textile carriers, we achieve high processing and usage versatility, such as a heavy cotton-polyester jersey, a very tear-resistant polyester knit, or a polyamide jersey that gives the synthetic leather bielastic properties. New developments include a material with microfiber fleece and a highly tear-resistant anti-slip version with a polyester filament fabric. For the lining of walls in the boat and caravan equipment, our soft foam PVC film is excellent.

Areas of Application

Living

Contract

Automotive

Sport and fitness

Boat- and shipbuilding

Small leather goods

Healthcare and medicine

Table cloth and table protectors

Properties

Electrically conductive

Phthalate-free

Biocompatible

Standard 100 by OEKO-Tex®, class 1

Flame-retardant

IMO FTPC Annex 1, Part 8

Our high-quality surface protection AvalonVinylSave has been specially developed for the particular requirements in the contract and medical sectors and guarantees long-lasting safety in use, especially for medical couches. The Amalfi and Pavona stock collections achieve excellent abrasion resistance thanks to this exclusive finish, enabling a longer service life for surfaces subject to heavy wear. In addition to this, AvalonVinylSave has been proven to reduce soiling by dry, watery and oily dirt (tested according to DIN EN ISO 105-A03) and thus protects the surface from stains caused by coffee, massage oil and sweat, for example. AvalonVinylSave makes the material easier to maintain, more stable, more sustainable and more durable.

AVALON VINYLSAVE

Protection of the surface

ACTICIDE®

*Protection against bacteria, viruses
and fungi*

ACTICIDE®

Material Protection

ACTICIDE® permanent material protection ensures lasting protection against bacteria, viruses and fungi. Our Cordoba and Chicago M stock collections have a special coating optimised with ACTICIDE®, which gives the material permanent antimicrobial, antibacterial and antifungal properties. Due to this high-quality material protection, it is particularly suitable for use in critical areas with increased hygiene requirements, for example in clinics or medical facilities. Based on its protection against microbial attack, ACTICIDE® also improves the outdoor resistance of our Cordoba and Chicago M stock collections.
