

Award winning - Vowalon wins the Innovation Award of the mtex+ 2018

We were able to achieve another success as an exhibitor for many years of the trade fair for technical textiles mtex+ this year: Vowalon was honoured with the coveted Innovation Award. With our high-quality surface sealing AVALON VINYLSAVE, we have improved the performance characteristics of the coated materials and we also expended the range of applications significantly for textile solutions...”, says jury chairman Prof. Dr-Ing. Markus Michael. This innovative surface protection is antimicrobial, resistant to detergents, massage oils, fat and perspiration and increases the life of the material by at least one year. AVALON VINYLSAVE is always available in a large variety of colours in our stock collections VOWAled Amalfi and VOWAled Bologna. For more information please click [here](#).

Visitor record in perfect weather - Open day at Vowalon

“The 6th Open Day on 26.05.2018 was a great success”, says Gregor Götz, managing director of the company Vowalon Beschichtung GmbH. We could welcome more than 700 visitors. Special highlights were the opening by the two world-class gymnasts Pauline Schäfer and Sophie Scheder as well as the unique fashion show of our models, who pulled our products from their Vowabags and presented current summer fashion by Seidel Moden Schreiersgrün.

The company tours with running production as well as the redesigned product exhibition proved to be visitor magnets. The performances of the I. Vogtländischer Schalmeeinzug Auerbach and of the TSV Weischlitz completed the programme. The younger guests were delighted with fire brigade tours, pony riding, children´s face painting and handicraft.
